More Accidental Deaths in 1934

There were 5566 accidental deaths in California last year as compared with 5153 such deaths in 1933.

Most conspicuous is the increase in motor vehicle deaths, of which there were 2798 in 1934, as compared with 2403 in 1933. Most motor vehicle deaths were due to collisions, 959 being attributable to collisions with pedestrians and 849 to collisions with other motor vehicles. Out of the 959 deaths due to collisions with pedestrians, 295 were in individuals 65 years of age and over and 29 were in individuals under four years of age. Among deaths due to motor vehicles in 1934, 1456 were in persons who were gainfully employed at the time of the accident, as compared with 1328 such individuals who died in 1933.

Small increases occurred in the occupational groups, including agriculture, mining, manufacturing, construction, transportation, trade, clerical and professional service. Out of 414 deaths due to occupational accidents last year, 134 occurred in trades, 75 in agriculture, 54 in construction and 51 in mining and quarrying.

There were also more deaths from accidents in the homes, as well as in public accidents which did not involve motor vehicles. More than half of all deaths due to accidents in the home were attributable to falls. There were 662 deaths due to falls in the home, 505 of which were in individuals 65 years of age and over.

There were 212 deaths last year due to conflagra-

tions, burns and explosions and 130 were due to poisonings, gas, etc.

There were fewer deaths due to accidents in air transportation last year, the number dropping from 76 in 1933 to 53 in 1934.

There were 333 drownings recorded last year as compared with 269 in 1933. More than half of all drownings occurred in individuals who were more than 25 years of age. Relatively few drownings occurred in individuals from 15 to 24 years of age.

The following table provides an analysis of deaths due to accidental causes in California during the year 1934:

Accidental Death Summary for California—Year 1934

Type of Accident	All ages (A)	0-4 (B)	5-14 (C)	15-24 (D)	25-64 (E)	65 and over (F)	Age unknown (G)

40. Other public accidents	90	1	11	12	55	11	---
41. Type of accident unknown	37	---	---	2	30	5	---

In addition to the 2,798 motor vehicle deaths in public places, shown above, there were 14 fatalities involving motor vehicles in homes and work places, making a grand total of 2,812 motor vehicle deaths. Of this grand total, 1,456 were of persons gainfully employed at the time of the accident.

NOTE.—Use Column G and Line 41 only when it is impossible by special investigation to determine the age of victim and/or type of accident.

L'ENVOI

When Earth's last picture is painted, and the tubes
are twisted and dried

When the oldest colors have faded, and the youngest
critic has died

We shall rest, and faith we shall need it—lie down
for an eon or two

Till the master of all good workmen shall start us
to work anew.

And those that were good shall be happy, they shall
sit in a golden chair

They shall splash at a ten-league canvas with brushes
of Comet's hair.

They shall find real saints to draw from—Magdalene,
Peter, and Paul

They shall work for an age at a sitting and never be
tired at all.

And only the Master shall praise us, and only the
Master shall blame

And no one shall work for money, and no one shall
work for fame

But each for the joy of the working, and each in his
separate star,

Shall draw the Thing as he sees it, for the God of
Things as they are.

—Rudyard Kipling

Living actions are largely concerned with conju-
gating the verb "to eat."—George Dorsey.

INFANT MORTALITY RATE FALLS

The infant mortality rate for California dropped from 53.4 in 1933 to 51.6 in 1934. The following counties show reduced mortality rates last year as compared with the preceding year:

Amador	Sacramento
Butte	San Bernardino
Calaveras	San Francisco
Contra Costa	San Joaquin
El Dorado	San Luis Obispo
Fresno	Santa Clara
Inyo	Shasta
Kern	Siskiyou
King	Sonoma
Lake	Sutter
Los Angeles	Trinity
Mariposa	Tulare
Mono	Tuolumne
Monterey	Ventura
Nevada	Yolo
Riverside	Yuba
San Benito	

Following is a partial list of cities in California which show reduced infant mortality rates in 1934:

Alameda	Salinas
Richmond	Sacramento
Fresno	Redlands
El Centro	Ontario
Bakersfield	San Diego
Hanford	San Francisco
Los Angeles	Stockton
Alhambra	Santa Barbara
Long Beach	San Jose
Pasadena	Palo Alto
Pomona	Watsonville
Santa Monica	Santa Rosa
San Rafael	Visalia
Monterey	Woodland
Pacific Grove	Marysville

There were 4047 infant deaths in 1934 as compared with 4022 in 1933. One-third of all infant deaths last year were in Mexicans. The infant mortality rate for the white race was 38.8 as compared with the rate of 51.6 for all races. The rates for the Indian and Negro races, together with that for the Mexican, was the highest. The Japanese infant mortality rate was almost as low as that for the white race. The following table provides an analysis of infant mortality deaths by races in 1933 and 1934:

	1934		1933	
	No.	Rate	No.	Rate
White	2,441	38.8	2,436	40.4
Negro	83	71.7	72	61.3
Indian	60	165.7	46	122.3

	1934		1933	
	No.	Rate	No.	Rate
Chinese -----	34	58.1	47	70.6
Japanese -----	64	39.9	75	46.0
Mexican -----	1,342	117.0	1,318	121.4
Others -----	23	74.2	28	91.5
Totals -----	4,047	51.6	4,022	53.4

EXAMINATION FOR TECHNICIANS
ANNOUNCED

The next examinations for certificates of proficiency in laboratory work are scheduled for May 25th in Berkeley and May 27th in Los Angeles. Anyone intending to take these examinations should write to the Bureau of Laboratories, Berkeley, for an application form. The signed applications should be mailed without delay and, in any case, not later than May 10th. Receipt of the application will be acknowledged by card which will be the holder's identification for admission to the examinations.
